Intern

September 2024 - October 2024

LETS UPGRADE

Online

- Proficient in essential Git commands such as commit, branch, merge, and rebase, enabling effective version control and code management.
- Experienced with GitHub Features: Skilled in using GitHub for repository management, including handling issues, managing pull requests, and utilizing project boards for tracking and organizing tasks.
- Applied best practices in collaborative development, including branching strategies and code reviews, to streamline team workflows and ensure code quality.
- Adept at identifying and resolving merge conflicts, maintaining codebase integrity, and ensuring seamless integration of changes from multiple contributors

Intern

October 2023 - November 2023

BHARAT INTERN

Online

- During my internship in Full Stack Web Development, I acquired comprehensive skills in building dynamic web applications from concept to deployment.
- Collaborating closely with senior developers, I gained proficiency in front-end technologies such as HTML, CSS, JavaScript I developed expertise in back-end development using database such as MySQL.
- Through hands-on experience in designing user interfaces, implementing RESTful APIs, and deploying applications on platform methodologies, problem-solving, and teamwork, enhancing my skills like Google Cloud.
- Demonstrated my ability to create robust and scalable web solutions.
- This internship provided me with valuable experience in agile development capabilities as a Full Stack Web Developer.

Intern

June 2023 - July 2023

EDU-NET FOUNDATION

Online

- Developed and deployed machine learning algorithms using Python to address real-world business challenges.
- Analyzed datasets to identify patterns and extract actionable insights, contributing to the improvement of existing AI/ML models.
- Conducted experiments to evaluate model performance and iteratively refined algorithms to enhance accuracy and efficiency. teamwork, enhancing my skills like Google Cloud.
- Collaborated with cross-functional teams to conceptualize and implement AI driven solutions, fostering innovation and problem-solving.
- Stayed updated with the latest advancements in AI/ML through literature reviews and integration of emerging technologies into project strategies.
- Contributed creative ideas and solutions during brainstorming sessions to drive project success and organizational growth development using database such as MySQL.

PROJECTS

Modified High Speed Vedic Multiplier design and Implementation: During this project, I was involved in the creation of Vedic Multipliers across various designs and applications. My responsibilities as a Team Lead included designing the structure of different components of the multiplier and synthesizing them to obtain the desired output. Throughout the synthesis and testing processes, I ensured the functionality and efficiency of the multipliers. One significant outcome of this project was the successful replacement of damaged devices with our designed Vedic Multipliers, thus contributing to the improvement and maintenance of various systems and devices.

Website Design, Optimization and Booking System Integration for a Fitness trainer: Revamped the Wild Yoga Norfolk website to resolve an issue where clients were redirected to a third party booking service. Integrated Wix's efficient booking system for a seamless booking experience. Additionally, optimized site speed and ensured mobile compatibility. Successfully transitioned the website to a more user-friendly booking system, improving customer satisfaction. Enhanced site speed and mobile responsiveness for an improved user experience. ([Have a Look](#))

E-commerce Website: Developed a fully functional and responsive e-commerce website using HTML, CSS, and JavaScript. The project features an intuitive user interface designed to enhance the customer experience, with interactive elements such as dynamic product displays, a shopping cart, and user-friendly navigation. Focused on creating a visually appealing design while ensuring optimal performance through clean, efficient code and adherence to best practices for web development. ([Have a Look](#))

Developed a Portfolio Website: Designed and implemented a professional portfolio website for a candidate, showcasing their skills, achievements, and projects. Leveraged Wix Studio's advanced features to create a responsive, visually appealing, and user-friendly interface. Worked closely with the client to understand their requirements and delivered a website that enhanced their online presence and personal branding. ([Have a Look](#))

Tracking Weather: Developed a dynamic webpage for weather tracking and analysis using HTML, CSS, and JavaScript. Designed a user-friendly interface that allows users to input their desired location and retrieve real-time weather information effortlessly. Integrated HTML for structuring content, CSS for modern styling, and JavaScript for implementing interactive features, ensuring both functionality and aesthetic appeal. The project enables users to seamlessly track and analyze weather conditions for any location, providing an intuitive experience for up-to-date weather insights. ([Have a Look](#))

Therapy Clinic: Developed a Therapy-focused website for an Ireland-based client using Wix, designed to promote mental health services and provide a calming, user-friendly experience. Collaborated closely with the client to understand their vision, incorporating features like appointment booking, client testimonials, and resource sections. Ensured a responsive design that worked seamlessly across devices and optimized the site for search engines to maximize reach. Focused on creating a visually soothing aesthetic and intuitive navigation to align with the therapeutic theme. Successfully delivered the project on time, enhancing the client's ability to connect with their audience and grow their practice. ([Have a Look](#))
